PROFILE

Specialist with experience in team management, logistics, and security, continuously developing professional skills in the IT field.

I hold postgraduate studies in Software Engineering from AGH University, where I gained knowledge of programming (C/C++), databases (SQL), Unix/Linux systems, and software testing.

I have developed and published several mobile applications on the App Store, including LullaBook, DustFall, and Dice, and I am currently working on my next project.

I am open to all possible career development paths, seeking opportunities in IT support, data analysis, or customer service, where I can combine technical skills with organizational and analytical experience.

SKILLS

IT & TECHNICAL SKILLS

- Mobile app development: SwiftUI, C/C++, SQL
- Databases & backend: Firebase (Firestore, Authentication, Cloud Functions)
- Operating systems: Windows, macOS, basic Linux/Unix
- Project management: Git/GitHub, Jira basics, Agile/Scrum
- Application testing, software development models, data analysis (Excel)

CUSTOMER SUPPORT & COMMUNICATION

- Excellent communication and interpersonal skills
- Experience assisting users and explaining technical issues clearly
- Ability to handle customer inquiries via phone, chat, and email
- Teamwork and collaboration skills
- Calm and professional approach under pressure

LANGUAGES

- Polish – Native / Fluent
- English – Intermediate (B2)
- Greek – Basic (A1)

ADDITIONAL STRENGTHS

- High motivation, responsibility, and strong personal culture
- Teamwork and training coordination skills
- Driving license categories A, B, C
- Flexibility and commitment to completing assigned tasks

INTERESTS

- Mobile technologies and user applications
- New technologies, mobile app development, and artificial intelligence
- Traveling and exploring new places
